

Change Log 12th Nov 2021

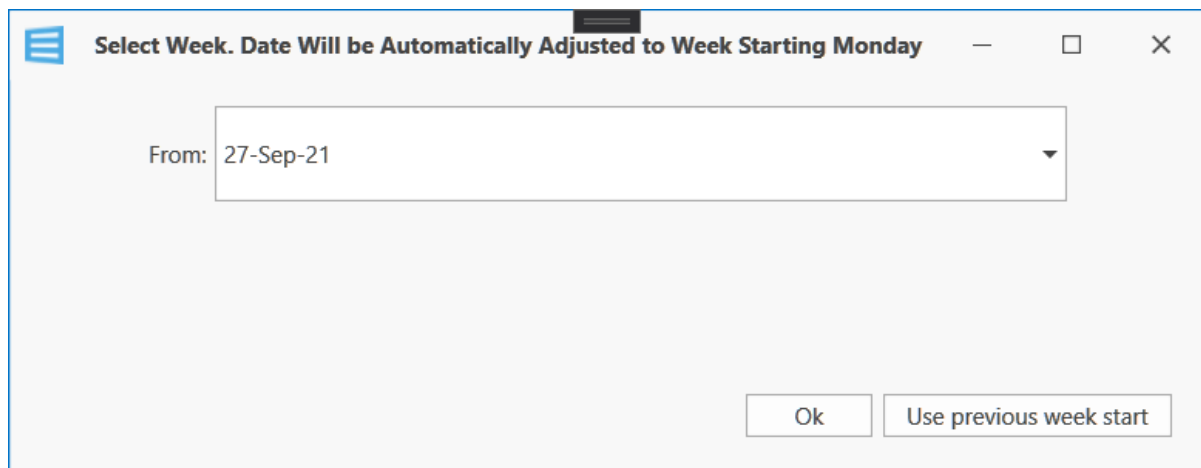

- Design -> Progress
 - o Added contractor progress update export/import
[Tutorial](#)

Change Log 18th Oct 2021

- Exo Resources
 - o Add/Edit no longer affect both locale (Perth/Montreal) and only updates depending on which version of BluePrints is installed (Perth/Montreal)

Change Log 29th Sep 2021

- Timesheet Entry
 - o Restricted to only querying a single week. With start date automatically adjusted to Monday to avoid duplicate records

The screenshot shows a standard Windows-style dialog box. The title bar contains a blue icon with three horizontal lines, followed by the text "Select Week. Date Will be Automatically Adjusted to Week Starting Monday", and standard minimize, maximize, and close buttons. The main area of the dialog has a light gray background. On the left, the text "From:" is followed by a date selection field. The field is a white rectangle with a thin gray border, containing the text "27-Sep-21" and a small downward-pointing arrow on the right side. At the bottom right of the dialog, there are two buttons: "Ok" and "Use previous week start". Both buttons have a white background and a thin gray border.

Change Log 17th Sep 2021

Design -> Job Permission, Construction -> Resource Allocation, EXO -> Master Job Permission

- Added bulk assign/unassign users

The screenshot shows the software interface with the 'Job Permissions' section highlighted in the left sidebar. The main panel displays a list of users with checkboxes for assignment. A red box highlights the 'Bulk Assign Users' button.

Design -> Job Permission

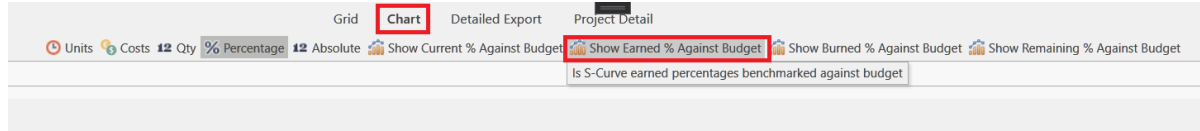

- Show all users even when they are not linked to EXO
- Show error message when user tries to add a resource that is not linked to EXO

The screenshot shows a table with columns 'Can Book' and 'User'. The 'Can Book' column has a red 'X' icon. The 'User' column shows 'Vijay Bhavsar'. A red box highlights the 'Can Book' column header. Below the table, a message states: 'User isn't linked to EXO, please link user to EXO in Data -> Users column Perth EXO and Montreal EXO'.

Change Log 15th Sep 2021

- S-Curve and Progress

- Added ability to set % benchmark measures against budget/current units

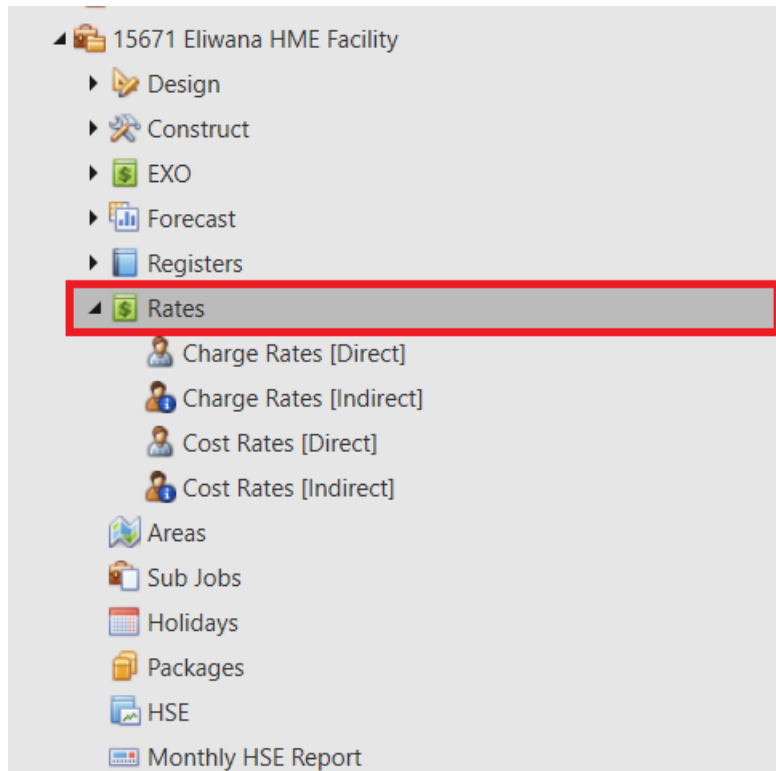

- Generated report will also reflect the same measure

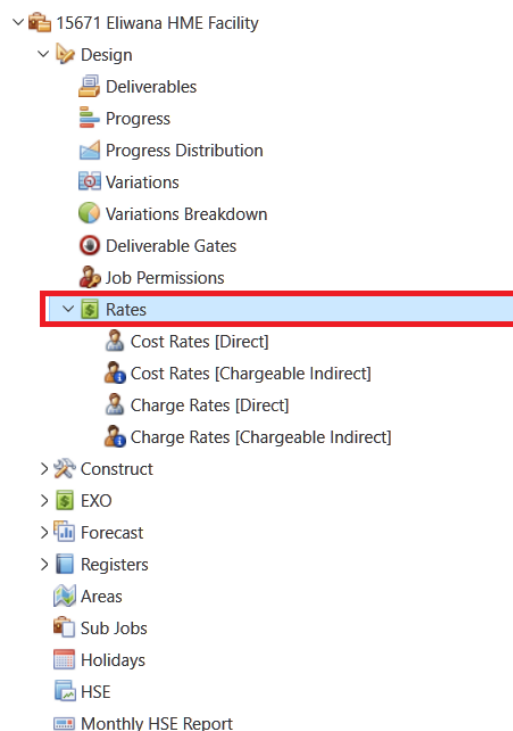

Change Log 1st Sep 2021

- Rates

- Rates for design has been moved into design category
- Old

○ New

- Improved S-Curve/Forecast loading

- Added Equipment Hire PO forecast which allows forecasting by stock code

Change Log 8th Feb 2021

- Design -> Variation
 - Added ability to auto reduce earned hours from latest date onwards to accommodate negative variation hours

⌵

📄 Export ✅ Check ❌ Uncheck

These deliverable have negative variation units that'll erode earn value when proceed, please select whether to:

1. Reduce earned by checking 'Reduce Earn Value'
2. Use max reducible units, overriding specified negative variation

A backup of progress will be automatically taken before variation approvals

Internal Name	Total Units	Earned Units	Maximum Reducible	Variation Reduction	Reduce Earn Value
X 00151-007-CAL-ST-002	100	50	-50	-75	☒

OK Cancel

In this instance, deliverable have 100 total hours and 50 hours already earned, but variation defines a 75 hours reduction, two options are available during approval

- Reduce earned hours ticked – Earned units will be reduced to 25 so that 75 hours reduction can be applied
- Reduce earned hours not ticked – Variation hours will be changed to 50 hours reduction instead of 75, as defined by maximum reducible units column

Cont. Change Log 8th Feb 2021

- Added ability to reduce earned units when variations are unapproved

These deliverable have negative variation units that'll erode earn value when proceed, please select whether to:

1. Reduce earned by checking 'Reduce Earn Value'
2. Use max reducible units, overriding specified negative variation

A backup of progress will be automatically taken before variation approvals

Internal Name	Total Units	Earned Units	Maximum Reducible	Variation Reduction	Reduce Earn Value
00151-007-CAL-ST-002	100	50	-50	-100	☐

OK Cancel

For instance, a variation that was previously approved with 100 hours is now in the process of unapproval. Since 50 hours has already been earned, 2 options are available during unapproval

- Reduce earned hours ticked – Earned units will be reduced to 0 so that unapproval with 100 hours taken away from the deliverable can take place
- Reduce earned hours unticked – Earned units will not be reduced, but user will see negative 100 hours remaining in progress

Change Log 27th Jan 2021

- Forecast

- Added ability to save forecast data to be retrieved by excel

001	400	Addition of Hydrogen Product Flow Meter	Project originally intended to meter hydrogen production by calculation of flow to tube trailers. Tube trailers no longer in scope. Produced hydrogen is used for fuel cell and balance sent to flare. Produced hydrogen would need to be determined by calculation based on fuel cell consumption, pressure drop across PCV to flare, and PCV position. This would not be accurate. Hazer have confirmed that they would like a flow meter to be added to this like. Est. budget price \$6k (supply) for a Vortex flow meter. Additional datasheet for new flow meter. Change Log 30th September 2020

- Exo -> Jobs
 - Not showing cost group and cost type error when stock code is VA001
 - Only validate cost group and cost type for new item in master job
 - Show duplicate error when committing to EXO
- Design -> Variations
 - Variation codes are pushes with default stock code item without cost group and cost type so that it doesn't clutter up forecast view

Change Log 11th September 2020

- Construction -> Variation
 - Allow negative values for revenue
- Construction -> Variation -> Variation Items
 - Remove cost group and cost type
 - Filter sub job in construction variation to show valid sub job codes only
 - Show cell error when sub job codes isn't valid for chosen type

Change Log 10th September 2020

- Forecast -> Forecast
 - Show empty cost group and cost type in forecast to accomodate variations without cost group and cost type coming from construction variation module

Change Log 9th September 2020

- Exo -> Jobs
 - Fixed an issue where committing to EXO resulting in empty cost group and cost type
- Design -> Risk Register
 - Revised risk register matrix

Change Log 7th September 2020

- Design -> Progress
 - Fixed an issue where at completion units doesn't match budgeted units when pushing to P6
 - Add a checkbox to allow certain projects to have current week ending data date
 - Added a button to copy start date to target start date and due date to target end date

Change Log 4th September 2020

- Design -> Progress
 - Data date will automatically change to current week data date when current day is the day of week for current week's data date

Change Log 1st September 2020

- Exo -> Jobs
 - Not validating/show errors on cost group and cost type when variation stock code is used
- Construction -> Variation
 - Group jobs by Sub Job code and commit to Exo using default stock code
- Forecast -> Forecast
 - Use total unapproved variation revenue to show unapproved revenue in forecast view

Change Log 24th August 2020

- Construction -> Variation
 - Added construction variation module
[Tutorial](#)

Change Log 29th July 2020

- Forecast -> Forecast

- Added column to show actual labour units post data date

Change Log 22nd July 2020

- Forecast -> Forecast
 - Removed colors from actuals history

Change Log 21st July 2020

- Exo -> Transaction, Exo -> Purchase Orders
 - Added stock code

Change Log 17th July 2020

- Design -> Deliverables / Progress
 - Added show variation name and approve units column

[How to check variation name and approved units](#)

Change Log 15th July 2020

- Design -> Deliverables
 - Added hidden column to allow subcontract hours to be excluded from forecast
- [How to exclude subcontract hours from forecast](#)

Change Log 14th July 2020

- Forecast -> Forecast
 - Added permission to allow user to edit construction forecast as uncommitted

Change Log 7th July 2020

- Design -> Job Permission
 - Fixed an error where newly added user isn't shown after refresh
 - Show only active users

Change Log 3rd July 2020

- Design -> Deliverables
 - Fixed an issue where subjob variation code doesn't show up in book time

Change Log 2nd July 2020

- Forecast -> Forecast
 - Try to fix an issue where module loads partial data
 - Not highlighting cells in green/red when date column's value is caused by PF changes
 - Try to fix summary calculation double up
 - Highlight PF column in green/red
 - Allow construction jobs cells to be edited when P6 project doesn't exist

Change Log 1st July 2020

- Allow user with permission to edit Exo -> Transaction quantity
- Editing Exo -> Transaction quantity will adjust line cost, line charge, line total, line total tax, line tax and linetotal incl tax in EXO
- Exo -> Timesheet narrative will be saved on day with hours so that when it's approved the narrative will be transferred over

Change Log 26th June 2020

- Design -> Deliverables
 - o Highlight duplicate client number in red
 - o Book Time dialog loads faster for user that doesn't have authority to book time for other users

Change Log 25th June 2020

- Forecast
 - o Uncommitted values can only be entered on procurement jobs
 - o Pasting uncommitted values on non-procurement jobs will show no results

[Test Case Clip](#)
